16

```
1 class ProteusPyWarning(Warning):
      """ProteusPy warning.
2
3
      ProteusPy should use this warning (or subclasses of it), making it easy
4
... to
      silence all our warning messages should you wish to:
5
6
      >>> import warnings
7
      >>> import ProteusPyWarning
8
      >>> warnings.simplefilter('ignore', ProteusPyWarning)
9
10
      Consult the warnings module documentation for more details.
11
12
13
      pass
14
15
```
